4. FIRST AID MEASURES

4.1 Description of first aid measures

Inhalation
Remove victim immediately from source of exposure. Get medical attention if any discomfort continues.

Ingestion
Seek immediate medical assistance. Rinse mouth and drink abundant water to dilute substance. Do NOT induce vomiting.

Skin Contact
Remove contaminated clothes. Wash affected areas with copious amounts of water. Seek medical attention if required.

Eye Contact
Immediately flush with plenty of water for up to 15 minutes. Remove any contact lenses and open eyes wide apart. Get medical attention immediately. Continue to rinse.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms : Inhalation: Can cause slight headache – Contact : can cause bloodshot eyes – can cause slight skin rash.

Acute and delayed effects : no post disorder effects are reported.

4.3 Indication of any immediate medical attention and special treatment needed

Immediate medical assistance : see point 4.1
Immediate / special treatment : see point 4.1
First aid specific means : eye wash fountain, safety shower should be available in the work area.

05. FIRE-FIGHTING MEASURES

5.1 Extinguishing Media
Carbon dioxide, Dry powder or Foam. Cool containers with water.
Unsuitable extinguishing media : Pressurised water jet.

5.2 Special hazards arising from the product
Vapours may form explosive mixture with air – in case of fire, the following can be released : Carbon monoxide, Carbon dioxide, smoke, soot.

5.3 Advice for firefighters
Spray extinguishing media to the base of flames. Use chemical protection clothing and self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

For non emergency personnel: in an emergency (i.e. unintentional important release of the product in enclosed space) respiratory protection (Gas filter A, Colour code brown: consider the maximum duration for wear) must be worn. Use insulating device for respiratory protection with an independent air supply in circumstances which are unclear - use adequate protections solvent resistant: security shoes, bodysuit, gloves and protective goggles (see point 8).
For emergency responders: as per non emergency personnel.

Emergency procedures: remove any ignition source and ensure adequate ventilation in working areas following accidental releases.

### 6.2 Environmental Precautions

Keep away from sewerage, surface water and groundwater. Do not allow to enter sewerage system.

### 6.3 Methods and material for containment and cleaning up.

Keep away from heat and use non-combustible absorbing sawdust (sand, specific binder). Refer to point 13 for the appropriate methods of waste treatment.

### 6.4 Reference to other sections

See point 4, 8 & 13.

## 7. HANDLING AND STORAGE

### 7.1 Precautions for safe handling

Safe handling: during handling keep original container closed - avoid contact with skin and eyes – wear adequate protective gloves protection and eye/face protection - avoid any sources of ignition - avoid exposing to high temperature during processing - maintain adequate local and general ventilation where product is handled.

Hygiene at work: do not ingest or apply to the skin as such - no smoking - remove contaminated clothing – good personal washing routines should be followed - if at risk of contamination, foods, beverages and other articles of consumption must not be stored or consumed at the work areas.

### 7.2 Conditions for safe storage, including any incompatibilities

Container: to be stored in stainless steel drums, preferably under inert atmosphere (nitrogen) with minimum head space, protected from day-light. • take note: the container used during transportation must be considered only as a temporary container and it must not be considered in any case adequate for medium or long term warehousing.

Conditions: stored in a dry, aerated place, away from any heat source and ignition source.

Temperature: from 5 °C and 20 °C.

### 7.3 Specific end use(s)

Use as odour agent / flavouring agent - the information of this section are not related to the use of the product in combination with any other material or any other process altering its characteristics.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### 8.1 Control parameters

Not determined.

### 8.2 Exposure controls

#### Protective Equipment

- Provide eyewash station.

#### Process Conditions

- Provide eyewash station.

#### Engineering Measures

Where appropriate, use closed system to transfer and process this material - if appropriate, isolate mixing rooms and other areas where this material is used or openly handled - maintain these areas under negative air pressure relative to the rest.
