Inhalation	Remove from exposure area to fresh air. Obtain medical advice if irritation persists.
Ingestion	Wash mouth out with water and obtain medical advice immediately. Do not induce vomiting.
Skin Contact	Remove contaminated clothing. Wash thoroughly with soap and water. Seek medical advice if irritation persists or there is any sign of tissue damage.
Eye Contact	Flush with plenty of water and seek medical advice.
4.2 Most important symptoms and effects, both acute and delayed	
Symptoms:	Inhalation: can cause slight headache. Contact: can cause bloodshot eyes. Can cause slight skin rash.
Acute and delayed effects:	No post-disorder effects are reported.
4.3 Indication of any immediate medical attention and special treatment needed	
see Section 4.1 for further information. Eye wash fountain and safety shower should be available in the work area.	

05. FIRE-FIGHTING MEASURES

5.1 Extinguishing Media	
Suitable extinguishing media: Small fire: CO ₂ , Dry powder, Foam. Spray to base of flames	

	Large fire: use water spray or fog. Cool containing vessels with water to prevent pressure build up, auto-ignition or explosion. Unsuitable extinguishing media: pressurised water jet.
5.2	Special hazards arising from the product
	Vapours may form explosive mixture with air. In case of fire, the following can be released: Carbon monoxide, carbon dioxide, smoke, soot.
5.3	Advice for firefighters
	Standard procedure for chemical fires: spray extinguishing media to base of flames. Use adequate respiratory protection to avoid inhalation of vapours. Wear suitable protective clothing.

6. ACCIDENTAL RELEASE MEASURES

6.1	Personal precautions, protective equipment and emergency procedures
	In an emergency (i.e. unintentional important release of the product in an enclosed space) respiratory protection must be worn. (Gas filter A, colour code brown: consider the maximum duration for wear). Use insulating device for respiratory protection with an independent air supply in circumstances which are unclear. Use adequate protections that are solvent resistant: security shoes, bodysuit, gloves, protective goggles. Remove any ignition source and ensure adequate ventilation in working areas following accidental releases.
6.2	Environmental Precautions
	Do not discharge into drains, water courses or onto the ground.
6.3	Methods and material for containment and cleaning up.
	Remove ignition sources. Ensure adequate ventilation. Absorb with inert, non-combustible, inorganic absorbent material, sweep up and remove to an approved disposal container.
6.4	Reference to other sections
	See sections 4, 8 and 13.

7. HANDLING AND STORAGE

7.1	Precautions for safe handling
	Apply good manufacturing practice & industrial hygiene practices, ensuring proper workplace ventilation. Wear adequate protection to avoid contact with skin and eyes. Ensure adequate ventilation at all times. Observe good personal hygiene, and do not eat, drink or smoke whilst handling. Do not ingest. Keep away from heat, sparks and open flame.
7.2	Conditions for safe storage, including any incompatibilities
	Store in tightly closed original container (stainless steel drum, preferable under inert atmosphere. E.g. nitrogen), in a cool, dry & ventilated area away from heat sources. Protect from light. Take precautionary measures against static discharge. Take Note: the container used during transportation must be considered only as a temporary container and it must not be considered in any case adequate for medium or long term warehousing.
7.3	Specific end use(s)
	Use as an odour agent / flavouring agent: Use in accordance with good manufacturing and industrial hygiene practices.
